

Please do not implement 02-278 as it lessens the current Indiana Telephone Privacy Law. Before I signed up for the Privacy Law I would receive 12 to 20 calls/day, many early morning, during our dinner hour, and up to 9:30 p.m. If I wanted these solicitations I am mature enough to investigate and find companies for these services. By blocking these calls, our family quality time is not interrupted and we are much more content. My time with my family is much improved as I am not constantly "warding off" offensive salespersons who will not take "no" for an answer. Thank you for reading my comments.
